Prairie Street Roadway Improvement Study
Section No. 16-00086-00-FP
City of Batavia

Dear Resident,

The City of Batavia is pleased to kick-off a study to reconstruct Prairie Street between Pine Street and Wilson Street. Prairie Street is an important route, serving as a main roadway for the entrance to J.B. Nelson Elementary School, local businesses, and residents, and is utilized by vehicles, pedestrians and bicycles. Currently, the roadway is in poor condition and will need to be completely reconstructed. This presents an opportunity to not only improve the traveling experience for vehicles, but for pedestrians and bicycles as well.

The first step in finding the best solution for Prairie Street is through a study of alternatives, known as Phase I. The Phase I study is now starting and is anticipated to conclude by the end of 2017. The study will include opportunities for public involvement. The study will be followed by contract plan preparation (Phase II), anticipated to be completed in early 2019. Construction of the project slated to start in 2019. Residents are encouraged to check in with the City website for project updates: <http://www.cityofbatavia.net/629/Future-Improvement-Projects>. Date ranges for the project phases above are subject to change due to funding availability and review by federal, state, and local agencies.

Over the next several weeks and during the Phase 1 and Phase 2, personnel from the City, its consultant Crawford, Murphy, & Tilly, Inc., and its subconsultants will be in the project corridor gathering information. This may include a topographic survey of the existing roadway, pavement cores, and identification of environmental features. If you have any questions or need additional information, please contact me at (630) 454-2760. Thank you for your cooperation.

Very truly yours,

Rahat Bari, P.E.
City Engineer
